An Example Headline

The primary typeface for the Golfpac brand is Proxima Nova. Below is a sample of usage.

Body copy for most applications is set in Proxima Nova Light. The copy here is set at 12pt on 18pt leading. Lines of text can be aligned to the left, right, center, or in some cases, justified. For better readability, avoid lines that are too long, or too short in length. Proxima Nova is the primary typeface and should be used most often. Use any weight or italics as needed for the design.

Proxima Nova Condensed can also be used as a companion typeface when space is at a premium. This is 12pt on 14pt leading.

Use Proxima Nova Condensed in ads, and in printed documents such as the brochure—anywhere space is at a premium. Proxima Nova Condensed is best used for disclaimer copy, bullet points, prices, and subheads. Avoid using the condensed typeface for display or headlines. Avoid using the Thin weight, as it can be hard to read.

Do's

To ensure the integrity of the brand, please do not alter the logo, other than the following:

- Scale the logo smaller or larger.
- Export as a JPEG, GIF, or TIFF.
- Add drop shadows, or effects as needed.

Do make sure to use the 1c_Solid_rev version of the logo on dark backgrounds. This logo has been specifically designed for this purpose.

Do Not's

The examples to the right are provided as a guide to avoid unsightly logo placements. There are enough variations of the logo designed to be used in every situation, be it print, web, faxes, horizontally, vertically, that the logo does not need to not be altered.

Do not use the logo in a sentence. Spell out Golfpac Travel, or Golfpac as normal copy.

Don't put the 3 or 4 color version on a dark background.

Don't put the logo too close to the edge.

Don't put the 3 or 4 color version on a dark photograph.

Don't put the reversed logo on a light background.

Don't stretch the logo.

Don't place text too close to the golfer's feet.

Don't alter the color of the logo.

Don't move the golfer.

The primary colors used for Golfpac branding are the following shades of green:

C 79 M 36 Y 100 K 27

C 0 M 70 Y 60 K 0

Red is used sparingly as a call to action color, and also for deep discount prices and hot deals. Red is also used to represent mountain regions.

RGB COLOR PALETTE FOR WEB

The RGB color palette is used for all Web applications such as websites, banner ads, and graphics.

Digital advertising still sometimes uses a CMYK palette. Check with the advertiser's specifications.

The Golfpac family of websites uses neutral background colors to emphasize the colorful course and hotel photography, and to limit the need for multiple CSS stylesheets—saving valuable bandwidth.
